

## Safe Chemical Handling

You can reduce the risks associated with transporting hazardous chemicals by taking a few simple steps:

- Do not mix different chemicals
- Do not transport leaking containers
- Leaking containers should be replaced and new containers properly labelled if the contents are known
- Bring along any printed information that might belong to any unlabelled chemicals
- Do not transport animals or foodstuffs alongside any hazardous or poisonous chemicals
- Wear protective clothing including gloves, long pants, long sleeves, boots and glasses when moving or packing farm chemicals for the collection.

it's time to  
**clean  
out**  
your household  
chemical clutter  
the right way

**AND IT'S  
FREE!**
